

Features:

- Filtering system within the search bar
 - Ability to select different types of animals/breeds
 - Search by attributes
- Pet Matching Questionnaire
 - A way to see if the questionnaire was approved by PAO management
- Provide pet profiles for each pet to allow more information to be shared for them and so they can be easily searched
- Allow users to save pet profiles so they can go back to them later
- Allow users to create their own listings, if they are qualified
- Easy to find and use application process
 - A guide to be able to help those who are confused
- Email/notification to know if the application was approved, and if so, provide a way that the applicant can reach out to the current owner
- Provide a way to easily complete the paperwork for the adoption
- Provide a list of resources and communities that people can reach out to, in order to get feedback from other adopters and help understand the process.
- Secure accounts but easy to sign in normally
 - Ability to update account details (e.g. change password) after supplying password again to remain secure
 - Account recovery
